# Electronic Requisitioning Project

November 2017

## E-Req Goes Live at PCH!

In order to achieve efficiencies in the requisitioning and purchasing process, our region is implementing a supply chain electronic requisitioning (E-Req) tool.

E-Req is an electronic tool that will allow Requisitioners and Approvers the ability to submit, approve and monitor purchase requisitions online.

We are very excited to announce that the E-Req tool went live at Providence Care Hospital (PCH) this month.

The E-Req Project Team was on site at PCH for two weeks to provide training and general support to the new users of the E-Req tool.

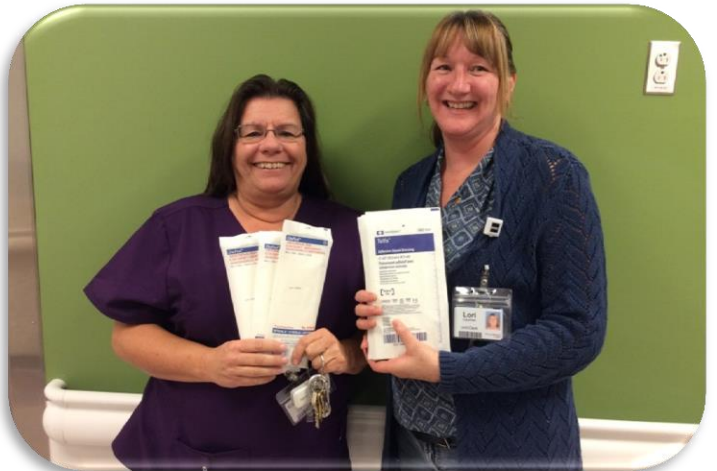

A total of 38 Users and 2 Buyers were trained at PCH.

*Satisfied E-Req Users!*

*Left: Nancy Delong, Secretary, PMR Program - Physiotherapy*

*Below: Christine Galler, Unit Clerk, Parkside o - Adult Mental Health and Lori Gauthier, Ward Clerk, Lakeview o - Adult Mental Health*

PCH is the second hospital to go live with this regional initiative. The E-Req tool will be rolled out to one new site each month:
